

BUSINESS TASK FORCE SUMMARY

JANUARY 2021

UPCOMING TRAFFIC SHIFTS, BRIDGE WORK & FRONTAGE ROAD CONSTRUCTION

AREAS OF FOCUS:

GREENVILLE AVENUE, ABRAMS ROAD AND FOREST LANE

PRESENTER: DIANNE TORDILLO

Partial Bridge Demo

- The Greenville Avenue, Abrams Road and Forest Lane overpass bridges at I-635 will be partially removed in sections, beginning in the early months of 2021
- Partial bridge demo will occur at various times for each cross street, not all at once
- Partial bridge demo is required to begin full reconstruction of the bridges as part of the project
- Both directions of traffic will remain open during bridge construction, maintaining access through the intersections while rebuilding the overpasses

Traffic Shifts Required

- Prior to bridge demo of overpasses, traffic must first be shifted at Greenville, Abrams and Forest to clear the demo areas
- Lanes will be reduced on the bridges once shifted to allow crews to perform necessary work of rebuilding the bridges, while both directions of traffic are maintained through the intersections
- The eastbound and westbound I-635 frontage roads between Greenville Avenue and Forest Lane will be shifted inward to continue frontage road construction
- Traffic shifts along the frontage roads will lengthen the opening to driveways

Frontage Road Construction

- Various frontage road construction will continue in the general area, consisting of more utility work, frontage road construction and rebuilding adjacent driveways

Note for Businesses with Driveways Along the Frontage

- At least one access point for each business will be maintained during frontage road construction
- If work requires any impact to businesses, the project's Public Information team will reach out to the contact appointed for each adjacent business gathered during outreach
