

# BUSINESS TASK FORCE SUMMARY

NOVEMBER 2021

## CONSTRUCTION AND TRAFFIC PHASING AT SKILLMAN STREET

AREAS OF FOCUS:

VARIOUS ACTIVITIES TO EXPECT AT SKILLMAN AND SURROUNDING FRONTAGE ROADS AND SIDE STREETS.

**PRESENTER: DIANNE TORDILLO**

### Recent Progress at Skillman Street at I-635

- July 2021 - Traffic alignment occurred through the intersection. New configuration consists of:
  - Two travel lanes each direction, curving east at Whitehurst Drive
  - Blocked off areas, including roadway sections, that are now construction areas for pavement removal
- There will be several more traffic realignments of this kind that will take place at the intersection as construction progresses.
- Temporary bridge to the west of Skillman Street will continue to be built out through next year
- Ongoing frontage road, pavement, drainage and utility construction in the area will continue
- Additional noisewalls will be built in the area

### Next Construction Phase to Expect

- Will take place mid-2022
- Shift traffic onto temporary bridge when construction is complete (summer 2022)
- Long-term closure of the EB I-635 entrance ramp from Skillman lasting up to 1 year (summer 2022)
- Demo of existing Skillman overpass bridge (late summer 2022)

### Sign Up Now to Receive Traffic Alerts

- The project team will be disclosing key specific dates once established to notify about the start of certain long-term temporary closures discussed in this presentation
- Subscribe now by visiting [www.635east.com](http://www.635east.com) and clicking on the Receive tab. Either sign up for eblasts or text alerts
